*DS1: Public Use Data*

1. **Confidentiality/Disclosure Risk:** In order to protect respondent anonymity and prevent disclosure risk, ICPSR has masked variables **ZIP** and **SCR13DJ**, and masked the day component of the variable **SCR9\_2**.
2. **Variable Differences:**
  - a. Several variables occur in the data but not the documentation; no further information was provided.
  - b. Some variables that are referenced in the questionnaire and methodology report are not included in the data set released by ICPSR; no further information was provided.
3. **Undocumented Codes:** The variables **RACETHNIIDSAL**, **SEXORIIDSAL**, **RACETHNIIDSAL\_2**, **SEXORIIDSAL\_2**, **SCR12\_2**, and **GENDERIDSAL** contain undocumented values which ICPSR has labeled "Undocumented Code." No further information was provided.

### **Variable Description and Frequencies**

**Note:** Frequencies displayed for the variables are not weighted. They are purely descriptive and may not be representative of the study population. Please review any sampling or weighting information available with the study.

Summary statistics (minimum, maximum, arithmetic mean, median, mode, and standard deviation) may not be available for every variable in the codebook. Conversely, a listing of frequencies in table format may not be present for every variable in the codebook either. However, all variables in the dataset are present and display sufficient information about each variable. These decisions are made intentionally and are at the discretion of the archive producing this codebook.
